

ARCHANA RAJU DATTA

+91 9619233412 | dattaarchana448@gmail.com | Mumbai, Maharashtra - 401209

PROFILE

B.Sc. Data Science graduate with Python, SQL, data analysis, data visualization, and basic machine learning. Comfortable working with structured datasets, building databases, and creating simple predictive models through academic projects. A quick learner with good problem-solving and communication skills, looking to start a career in data and analytics.

EDUCATION

B.Sc. Data Science	CGPA: 7	2022 – 2025
Senior Secondary (H.S.C.)	Percentage: 51%	2021 – 2022
Secondary School (CBSE)	Percentage: 74.4%	2018 – 2019

TECHNICAL SKILLS

Programming & DSA	Python, Data Structures & Algorithms (DSA), HTML
Databases & SQL	MySQL, SQL Querying, Database & Table Management
Data Analysis	Pandas, NumPy, Microsoft Excel, Basic EDA
Data Visualization	Tableau
Machine Learning & AI	Basic Machine Learning Concepts
Tools	Jupyter Notebook, MySQL Workbench, VS Code

EXPERIENCE

IT Associate — Courtyard by Marriott, Nashik

Feb 2026 – Present

- Delivered end-to-end technical support to employees, resolving computer, software, printer, and connectivity issues to minimize operational downtime.
- Diagnosed and troubleshooted complex technical problems, escalating unresolved cases to ensure prompt and effective resolution.
- Configured and administered Outlook email accounts, printer installations, and Wi-Fi connectivity to ensure seamless daily operations.
- Executed and monitored routine software backups using the Veeam backup tool to safeguard critical data integrity.
- Maintained comprehensive IT request documentation and collaborated cross-departmentally to streamline technical support delivery.

PROJECTS

Employee Performance Mapping

Technologies: MySQL, MySQL Workbench, https://github.com/archanadatta/Employee_SQL_Project.git

- Designed and implemented a structured relational employee database to organize employee names, departments, job roles, and salaries.
- Created normalized tables and wrote SQL queries to insert, update, retrieve, filter, sort, and analyze employee data efficiently.
- Analyzed department-wise and role-wise distribution and salary patterns to generate business insights.

Healthcare Management: Patient Readmission Prediction

Technologies: Python, Pandas, Tableau, MySQL,

<https://github.com/archanadatta/Healthcare-Management-PatientReadmission-Prediction-.git>

- Built a machine learning pipeline to predict patient readmission after hospital discharge using historical healthcare records.

- Performed data cleaning and exploratory analysis with Pandas and NumPy to identify key attributes linked to readmission, visualized through charts and graphs.
- Trained and evaluated classification models using Scikit-learn, comparing performance metrics to select the most reliable predictive model.
